

01 Introduction

Google Classroom is an online tool accessed through a computer, a tablet or a smart phone that enables students and/or parents take part in lessons and in online learning.

Google Classroom is not a replacement for face-to-face learning, but it does help you stay organised and on top of work - and the remote learning features of Google Classroom lend themselves well to situations where the teacher and student cannot be face-to-face.

What does Google Classroom look like?

Google Classroom can be accessed in three ways. The method you choose should best fit your available devices.

1. Using a web browser on a computer, preferably a laptop
2. Using the Google Classroom app on a tablet computer
3. Using the Google Classroom app on a SmartPhone

This is an example of what Google Classroom for Class 7 looks like using the web browser on a computer:

The same class looks slightly different in the Google Classroom app on a tablet computer. This is the same class but using the app on a tablet:

And finally the same class on the app on a SmartPhone:
